

Kindling technical description

1. Technical description

Kindling is produced from spruce and pine by splitting and drying round softwood. Due to low moisture content, size and used wood species they are easy to light. Ideal to use with other wood fuel.

Moisture content	8.00-15%
Sulphur content	0,02 %
Calorific value	4,7 -5 MWh / t
Material	100 % pure softwood.

2. Packing description

**9,5 rdm3 or ca. 4 kg
kindling per net bag.**

96 net bags per pallet.

**60 pallets or 5760 net
bags per truck.**
